

The BUKO GROUP logo is displayed on a dark, textured background. The word "BUKO" is in large, bold, white capital letters, followed by a small red dot and the word "GROUP" in white capital letters.

# CASE STUDY: Foresolutions & BUKO Group

## Delivering Safety First with Body-Worn Camera Solutions

### BUKO Group Values:

- Safety first
- Always delivering quality work
- Building long-term relationships with customers and employees
- Committing to a sustainable business approach

- ❑ BUKO Group provides temporary traffic management across Europe. As a leading service provider, we specialise in traffic solutions for temporary and urgent situations. Our services primarily support contractors and public authorities involved in utility-related and urban or rural roadworks.

# The Bodycam & Radio all in one

## Live camera footage uploads

Real-time streaming capabilities for immediate situational awareness

## National coverage

Comprehensive connectivity across all operational areas

## Ideal lone worker solution

Enhanced safety for employees working independently in the field

## Extension of existing digital radio systems

Seamless integration with current communication infrastructure

# Case Study: Hytera VM580d

Foresolutions Ltd has helped a Buko equip their team with a body worn camera solution.

## Key Customer Requirements

- Safety and evidence gathering for staff
- Incident prevention
- GDPR compliance
- Lone working
- Protection

## Client Overview

BUKO Group crafts safe, slick traffic flow for temporary roadworks, events, and construction across Europe. Handling planning, signage, deployment, digital solutions, even remote surveillance, so roads work smoothly without you noticing. [b](#)

They run on “safety first,” quality, trust, teamwork, and sustainable service, it’s not just business, it’s repeating the same precise choreography so clients stick around. [b](#)

# Our Brief

The management team wanted to add some extra protection for their large team of workers on across sites. Key requirements were safety and evidence capture so that in the instance of any disputes the client had clear, credible footage of all activity. Body worn cameras were seen as the clear choice for the client, with their ability to run apps that can then seamlessly transmit data to a central hub.

## We chose Hytera as the ideal solution:

### Hytera VM580D Bodycams

Advanced body-worn camera technology with integrated communication features

### Hytera IDS Software

Intelligent data management system for secure footage storage and retrieval

### Hytera DEMs Software

Device management platform for centralized control and monitoring
