

Installation Engineer (Vehicle & Networks)

Are you an experienced Vehicle Installation Engineer ready to take your skills to the next level? Join Foresolutions, a leading provider of intelligent tracking, telematics, and communication solutions, as we continue to expand our team.

About the Role

We're looking for a skilled Installation Engineer with proven experience in vehicle electronics, GPS, BLE, and video telematics systems. You'll be part of a growing technical team delivering high-quality installations and connected solutions across the UK. Helping our customers stay efficient, informed, and connected.

What You'll Do

- Install and commission tracking, telematics, and video systems in specialist and fleet vehicles
- Work across aviation, construction, transport, and logistics sectors
- Conduct technical site surveys and system assessments
- Support airside and field-based projects at major UK sites and airports
- Travel across the UK from our Hampshire headquarters

What We Offer

- Competitive salary
- Company vehicle provided
- Travel allowances
- Opportunity to work with cutting-edge connected and networked systems
- Varied projects across high-growth sectors

Who You Are

You're a hands-on, detail-oriented engineer who enjoys solving problems, working with advanced technology, and delivering first-class installation quality. Experience with GPS, BLE, and video telematics systems is essential, along with a strong understanding of vehicle networks and electrical systems.

Ready to Apply?

If you're ready to bring your technical expertise to a fast-growing company working at the forefront of connected solutions, we'd love to hear from you.
