

## **January 2026 Monthly Round Up**

**Our Head of Engineering, Matt Gardener, attended Heathrow on the very first day Foresolutions became fully mobile at LHR, and we successfully got our vehicle airside which was a great step forward for our operations and on-site capability at one of the UK's busiest airports.**

**Our Business Development Director, Imogen Ross, has been back in Dubai, meeting with new contacts and strengthening relationships as we continue expanding Foresolutions into the Middle East.**

**This month we welcomed Claire, our new Senior Sales Executive.**

**Claire has been attending meetings in Manchester and conducted a full survey at one of the city centre's most luxurious landmark properties, helping connect their Security, Concierge, and Facilities Management (FM) teams across the development.**

**Imogen Ross also visited the DHL Innovation Centre in Dubai, exploring how we can collaborate and support with connected solutions including asset tracking, PTTc communications, and RFID.**
